## Systems Engineer (M/F)

**Location:** Caparica

Our client, a prestigious company in the space sector, located in Caparica, intends to recruit a Systems Engineer for direct integration in space projects

### Responsibilities:

- Technical Coordination of the process of development and integration of complex aerospace systems involving different technological areas, for example, Mechanical, Electronic Systems, Software, among others;
- Production and management of technical documentation (including version control and follow-up of applicable standards);
- Interface with partners and subcontractors;
- Elaboration and follow-up of systems engineering plans.

### Requirements & Qualifications:

- Aerospace Engineering (preferred) or similar training;
- Minimum 5 years of proven experience in engineering, including 3 of them in systems engineering;
- Experience in aerospace design (plans for execution and development of the activity, procedures, systems integration, document analysis and quality of the same);
- Knowledge of specific standards for the aerospace industry (preferential ECSS standards, ISO 9100);
- Analytical capacity and problem solving;
- Ability to work as a team;
- Responsibility and autonomy;
- Fluent English (oral and written);

### Offer:

- Salary package based on experience and skills.
- Strong possibility of continuous growth and career development.

If you meet the above requirements, please send your application via email:
