T202309_PRO_Quality Manager

Our client specializes in the machining of mechanical parts and high-precision assemblies, sheet metal working/boiler making, and the assembly of larger assemblies (batches). The group is present in the aeronautics (aerostructure, aero-engine), automotive (premium and motorsport), defense, naval, energy, and space (DNES) industries.

Location: Évora

Main Accountabilities:

- Supervise and manage a Team of around 30 people working in the Quality area. You will interact closely with people from other departments who contribute to this area, as well as Quality people at the group level.
- Enforcing the quality and environmental safety policy at production sites.
- Ensuring the implementation of the necessary measures to guarantee the safety of personnel and resources in the various units under their responsibility, delegating responsibility to the entities for which they are responsible.
- Assisting those responsible for the processes in their implementation.

Requirements and Qualifications:

- Bachelor's or master's degree in engineering in a relevant domain, e.g. Chemistry; Industrial Engineering; etc.
- + 5 years of experience executing a similar role;
- Previous experience in the aeronautic industry is valued but not strictly necessary; it can be considered relevant experience in automotive or others;
- Relevant experience in auditing and performing inspections at an industry level.
- Proactive and dynamic attitude;
- Willingness to learn, collaborative spirit, and a team player;

If you meet the above requirements, please send your application via email: careers@qsr.consulting with reference to T202309_PRO_Quality Manager.

Languages:

Basic/Intermediate French is mandatory;

Fluency in English;

The following activities (not limited to) are foreseen:

- Optimize the Management Systems of the various entities of the Company through the Corporate System.
- Ensuring that procedures are relevant, complete, and implemented, measuring their effectiveness, and reporting on them.
- In relation to the previous two points: co-leading the Management Reviews and directing (by delegation) the AML / QSE process.
- Managing the staff of the Quality - Environment - Safety department (including QSE site managers with direct or functional responsibility, depending on the scope of certification).
- Monitoring and ensuring the implementation of the QSE strategy and policy. Ensure (by delegation) that HSE regulatory compliance activities are carried out.
- Acting as a point of contact with public authorities and certification bodies.
- Monitoring the Group's improvement initiatives.

Offer:

- Wage package appropriate to the presented experience;
- Position type: Full-time regular employee;
- Permanent contract directly established with our client.

If you meet the above requirements, please send your application via email: careers@qsr.consulting with reference to T202309_PRO_Quality Manager.
