Project Manager – Innovation - Space Sector (Portugal)

Ref.^a T20263

Our client is a company focused in unlocking earth observation's full potential to understand our planet and transform it for the better. They work alongside with their partners, using their high quality imagery and analytics expertise to extract insights that help making the right decisions.

We are looking for a **Project Manager** to join our team in Portugal, reporting to the New Products & Services Manager in the Innovation Department.

Location: Lisbon, Portugal

Work Regime: Hybrid

Accountabilities:

Responsible for activities associated with Customer Support and Project Management.

The duties and responsibilities of the job include, but are not limited to:

- Manage Innovation Projects related with the development of New EO-based Products & Services;
- Ensure end-to-end management (scope, planning, implementation, resources, reporting) and its alignment with the company objectives;
- Ensure that innovation projects lead to new solutions to address users and customers needs;
- Prepare and maintain project documentation, progress reports, KPIs, and compliance with customers and internal conditions;
- Support the preparation of new proposals.

Requirements & Qualifications:

- Bachelor's or master's degree in Engineering (Aerospace, Earth Sciences, or a related field);
- Understanding of remote sensing technologies, geospatial data, and Earth observation applications;
- Excellent analytical and problem-solving skills;

If you meet the above requirements, please send your application via email: lgoncalves@qsr.consulting with reference to T20263_Rec_ Project Manager – Innovation - Space Sector

- Demonstrated ability to translate customer needs into successful product features;
- Familiarity with agile development methodologies;
- Strategic thinking and ability to align product initiatives with business goals.

Experience

- Engineer with experience managing innovation and technology-driven projects, ideally related to data, geospatial, and EO products;
- Taking projects ideas from ideas and/or prototypes to products;
- Coordination of multidisciplinary teams and in working in fast-paced innovation environments;
- Preferable, experience in Security and Defence related projects;
- Proven experience as a Product Manager, preferably in the Earth observation or geospatial industry;
- Experience replaces training.

Languages

- English (mandatory)
- Spanish (optional)

Additional Training Desirable

- Project Management
- Geospatial Data Analysis Tools
- Earth Observation Technologies
- Business Analytics and Metrics
- Communication and Presentation Skills
- Negotiation and Influencing Skills

Offer:

- Career development opportunity.
- Wage package appropriate to the presented experience.
- Access to various benefits such as training academy, health insurance, among others.
