Software Tester

Ref.ª T202302_PRO_SoftwareTester

Our client provides advanced experience in system design and architecture, cloud computing, media asset management, integrations, building of APIs and UI/UX design. This includes projects in several different technology stacks and incorporating aspects in far reaching areas of knowledge such as Artificial Intelligence, Augmented Reality, Blockchain, Cybersecurity, digital forensics and digital data preservation among others.

The company is hiring a Tester, having as main objective the testing of Reevo product, which requires different scopes and levels of testing.

Location: Leiria, Portugal

Main Accountabilities:

- Derive tests covering all requirements (in C# as system tests);
- Locate undocumented behaviours and create requirements for them (or remove that behaviour);
- Document the main tests covering a given requirement (in Enterprise Architect);
- Test of no cross-talk between multiple requests to different terminals, handled by the same/different Reevo instance(s).

Requirements & Qualifications:

- Master's Degree in Software engineering/Computer science or similar.
- Required at least 3 years of experience in development or creating automated tests.
- Required at least 1 year of experience in C# development.
- Previous knowledge of different Linux distributions, standard Unix tools, and bash scripting.
- Familiar with virtualization mechanisms.
- Familiar with building software from sources and related tools: make, CMake, git.

Experience in the following Tech stack:

- ISTQB certificates.

If you meet the above requirements, please send your application via email: careers@qsr.consulting with reference to T202302_PRO_Software Tester

- C++.
