Junior Computer Science Engineer (Portugal)

Ref.ª T202402

Our client is a company focused in unlocking earth observation's full potential to understand our planet and transform it for the better. They work alongside with their partners, using their high quality imagery and analytics expertise to extract insights that help making the right decisions.

We are looking for a Junior Computer Science Engineer to be integrated in Portugal, reporting to Research, Development, and Innovation Department.

Location: Lisbon, Portugal

Work Regime: Hybrid

Accountabilities:

The following in bold are considered critical:

- Write and debug code in various programming languages, such as Python, Java, C++.
- Assist in the implementation of software solutions based on project requirements.
- Assist in maintaining and troubleshooting computer systems, networks, and databases.
- Monitor system performance and ensure software and hardware configurations are up to date.
- Create and maintain technical documentation, including code comments, user guides, and system manuals.
- Participate in software testing and quality assurance activities to identify and resolve bugs and issues.
- Perform unit testing and collaborate in the development of test cases.
- Assist in project planning, estimation, and execution.
- Collaborate in the design and development of new features and enhancements.

You will work closely with cross-functional teams, including software developers, hardware engineers, and IT professionals. Seek guidance and mentorship from senior team members to enhance skills and knowledge.
