# Project Manager (Space Sector)

Ref.<sup>a</sup> T20265

Our client is a space systems engineering company, delivering advanced design solutions and turn-key space SW systems. Building on a solid team of highly motivated and specialised engineers, it is now a reference player in the European space sector, leading in the areas of Mission Analysis, Guidance, Navigation and Control, Global Navigation Satellite Systems Technologies, Ground Segment Systems and Earth Observation applications.

The selected candidate will support the company in several projects regarding management of project, contact with customer, preparation of bids, etc. Currently the company is working on several R&D projects for the European Commission and ESA to provide cutting edge technologies for Earth Observation, satcom and science satellites.

**Location:** Lisbon/Coimbra (Portugal)

## Main Accountabilities:

The person in charge of this position will support the company in Satellite Missions, Artificial Intelligence and GNC projects as well as proposals for ESA and European Commission, which will lead to an increase in the number of projects.

## Requirements & Qualifications:

### Education:

- Preferred: M.Sc. in Aerospace Engineering, Industrial Engineering, Computer Science Engineering, Telecommunications Engineering.

### Professional Experience:

- Required: Minimum 5 years in Project Management (preferably in Space industry or high-tech environments).

### Technical Requirements:

The candidate should have some, but not all, of the skills below:

If you meet the above requirements, please send your application via email: [careers@qsr.consulting](mailto:careers@qsr.consulting) with reference to T20265\_Rec\_Project Manager

- Required:
  - Experience managing projects (time and resources management, project planning, risk mitigation, ...) involving customers at different levels
  - Knowledge of financial management, technology management and internal controls
  - Experience dealing with customers and providers
  - Used to multicultural teams and international environments
  - Commercial approach
  - Experience in project planning tools
  - Experienced user in Excel and other MS Office tools
  - Experience preparing and presenting reports at different levels
- Desired:
  - PMP certification
  - Knowledge of the space sector or other complex engineering environments
  - Technical writing, including user-facing documentation
  - Demonstrated ability to communicate effectively with customers as well as with team members in remote locations

Languages:

- English (C1 level as minimum), spoken and written.

**Offer:**

- Wage package appropriate to the demonstrated knowledge and experience.
- Career development opportunity.
- Contractual link established directly with our client's company.
- Work in highly innovative projects with ESA (European Space Agency).

If you meet the above requirements, please send your application via email: [careers@qsr.consulting](mailto:careers@qsr.consulting) with reference to T20265\_Rec\_Project Manager
