Technical Manager - Ground Segment (M/F)

Ref.^a T202203

Our client is a space systems engineering company, delivering advanced design solutions and turn-key space SW systems. Building on a solid team of highly motivated and specialized engineers, is now a reference player in the European space sector, leading in the areas of Mission Analysis, Guidance, Navigation and Control, Global Navigation Satellite Systems Technologies, Ground Segment Systems and Earth Observation applications.

The company is selecting a software **Technical Manager to** drive the development of innovative software products for the Space industry. The Technical Manager interacts in a cross-functional way with several teams, involved in launching new products and improving existing features, leading a team of software engineers and scientific experts. Space means constant innovation, meaning that craving for new solutions is highly valuable.

You will mentor and guide people to figure out the best technical solutions for the Ground Segment / Data Systems business unit challenges. You will also analyze existing software products and development methodologies, promoting improvements and new solutions.

Location: Lisbon, Portugal

Main Accountabilities:

The following types of responsibilities are envisioned:

- Design technical solutions for requirements of software products, including the integration with other software modules, communicate and lead the software teams to guarantee the implementation, tests, and delivery.
- Organize, with the team members, the tasks and resources required to successfully guarantee the deliverables, monitor, and control the development and promote corrective actions whenever required.
- Undertake daily follow-ups with team members to ensure products and tasks are on track and goals are being met.
- Communicate with customers and with all the teams involved to guarantee a transparent channel of communication between key stakeholders, while managing expectations.

If you meet the above requirements, please send your application via email: careers@qsr.consulting with reference to T202203_PRO_Technical Manager - Ground Segment (M/F).

- Participate in commercial activities by supporting the sales personnel, conducting presentations, and writing the technical sections of commercial proposals when required.
- Lead and conduct knowledge transfer workshops for both software development, scientific and business teams.
- Provide training to the team members supporting their professional growth and motivation.
- Conduct technical interviews to hire new team members to the teams.

Requirements & Qualifications:

Required:

- Computer science background
- Previous experience as a software developer
- 5+ years of experience as a Technical Manager / Leader
- Experience with at least one Agile framework like Scrum, Kanban, other
- Experience running software products of varying size and complexity
- Educator and coach leadership style

Desired:

- Experience with GIS (Geographic Information Systems) and EO (Earth Observation)
- Motivation to work in the Space industry

Languages:

- High level of English (spoken and written)

Offer:

- Wage package appropriate to the presented experience
- Career development opportunity
- Contractual link established directly with the company

If you meet the above requirements, please send your application via email: careers@qsr.consulting with reference to T202203_PRO_ Technical Manager - Ground Segment (M/F).
